

# Import TikTok Workflow JSON into n8n

## Overview

This guide walks you through how to import a pre-built workflow JSON into your n8n dashboard. This specific workflow automates posting videos to TikTok using Google Drive and the UploadPost API.

## Step 1: Log Into n8n

1. Open your deployed n8n instance in your browser (e.g., <https://your-n8n.onrender.com>).
2. Log in using your credentials.

## Step 2: Create a New Workflow

1. In the n8n dashboard, click the **++ New Workflow** button.
2. Give your workflow a name (e.g., "TikTok Auto Poster").
3. Click into the blank canvas area to begin editing.

## Step 3: Paste the JSON Workflow

1. Click the **three dots** (...) in the top-right corner of the workflow editor.
2. Select **Import from Clipboard**.
3. Paste the full JSON provided (from your setup guide or seller).
4. Click **Import**.

This will populate the entire workflow with all nodes preconfigured.

## Step 4: Connect Credentials

1. Click on the **Google Drive node**.
2. Under 'Credentials', select or create your Google Drive OAuth2 credentials.
3. Click on the **HTTP Request node**.
4. In the Headers, paste your UploadPost API key.

5. Update your Google Drive file ID and username if needed.

## **Step 5: Test and Activate**

1. Click the **\*\*play button\*\*** on the top right to test the workflow manually.
2. Confirm that a video is uploaded to TikTok.
3. Once working, click **\*\*Activate\*\*** to enable auto-posting on schedule.
